

***Life is Fragile! Handle with Care!!***

## **Daily Safety Emphasis**

## ***Precautionary Measures***

### **Did You Know...**

- Precautionary Measures that should be considered before every job:
  - Have the work scope and safety aspects been discussed and understood?
  - Are you using the right tools? (In good condition, valid inspection label, etc.)
  - Do you know where to find the nearest emergency shower, eyewash, and fire extinguisher?
  - Do you know where the assembly area and the site evacuation areas are?
  - Has the procedure been reviewed and necessary precautions identified? (Permits, PPE, fall protection, gas detection, etc.)

***Thought For The Day***  
***Safety is an investment that pays dividends***
